Small Business solutions personalized to your business requirements

Thinking about starting a small business or need help getting the IT portion of your business operational, ecWest offers complete set of services to help your business get up and running fast. Our small business solutions include:

- *Computer Sales, Repair & Upgrades*
- *Integrated & High Performance Servers*
- *Out-Sourced IT & Maintenance*
- *Network Design & Infrastructure*
- *Internet Development*
- *Wireless Networks*

Computer Sales, Repair & Upgrades

ecWest offers quality computer systems for your small business. Each workstation system uses an Intel processor and motherboard, Microsoft Operating system, and other quality components. ecWest builds the systems to your specification.

Integrated & High Performance Servers

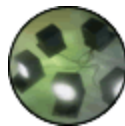

So you have a new or emerging business but don't have the infrastructure or IT staff that you need to get your business off the ground. ecWest offers exceptional server solutions for a totally integrated small business.

- *ecWest offers a complete line of High Performance Servers* - Whether you need one or many servers, ecWest offers a complete line of high performance servers for your small business needs.
- *Microsoft Small Business Server* - A Microsoft Windows based server which contains an integrated suite of server products to function as an IT department.

Out-Sourced IT & Maintenance

ecWest can ensure that your organization is running at peak performance by timely and professional troubleshooting and maintenance or your organization can establish a maintenance contract to give your business full IT operations with at a nominal monthly service charge.

Network Design & Infrastructure

ecWest offers complete networking solutions for the Small Business. We can design, implement, and explain any of the network designs including Cable, Dial-up, DSL or Satellite Internet connections or create a custom network typology. Our team is trained in DNS, HTTP, SMTP, FTP, DHCP, and other Internet protocols to ensure that your network is setup correctly and works to expected performance levels.

Internet Development

Our team works closely with clients, assisting them in all phases of a project from strategic planning to site operation and maintenance. Whether the task is a news release, bulletin board, order form, or animated galaxy, our talented Internet developers can perform such tasks as html coding, scripting, database development, and e-commerce programming for an Internet presence that brings your small business imagery to life.

Wireless Networks

Allow your staff to efficiently connect to your small business locations. Our solutions include LAN and 802.11a, b and/or g Wireless network design, Mobility planning and setup, Security, firewall protection, DHCP management, network printing, and training for your business
